Declaration

This product has passed the final check for both functionalities and package when delivered from the factory. All users should observe the instructions and pay attentions to the warnings covered by this manual. Unreasonable damages resulting from unintended operations or not heeding instructions covered by this manual will void the warranty. Specifications in this manual intend for reference only, the fixture delivered takes the priority. Any future modification pertaining to content of this manual, there will be no particular notifications. FINE ART reserves all copyrights. To obtain the latest information about software update, hardware and other files, please visit FINE ART website.

1. Safety information

The following symbols are used to identify important safety information on the product and in this manual:

WARNING!

Read the safety precautions in this section before installing, powering, operating or servicing this product.

After receiving the fixture, please unpack and check if there is any damage due to transportation. If any obvious damage or flaw is found, do not put it into use and contact the distributor or manufacturer as soon as possible.

This fixture is intended for professional use only. When operating the fixture, attentions should be drawn to fire/electric-shock hazards and lethal injuries caused by fall.

Read this User Manual before mounting and ennergizing the fixture. Observe the safety guideline and notice the warnings both in this User Mannual and on the fixture. Yet any safety concerns not covered hereby, contact the distributor or service hot-line.

Protection against over heat

This fixture is suitable for indoor environment. its protection rating is IP20.

The fixture should be kept dry and avoid working in presence of moisture, over-heat or heavy smokes.

$t_a = 40^{\circ}\text{C}$

The natural working temperature should be lower than 40 degrees. If the ambient temperature exceeds 40 degrees, please stop operating the unit immediately.

Protection against explosion

Protection screen must be replaced if they have become visible damaged to such an extent that their effectiveness is impaired.

Protection against injury due to falls

To inspect that the structure and the truss hooks are in good condition and can bear about 10 times the weight of the fixture.

Ensure the cover and all riggings are securely fastened, safety wire is necessary to use as a secondary attachment.

Block access below the working area and work from a stable platform while installing, servicing or moving the fixture.

Protection against electrical shock

All connections or maintenances must be performed by a qualified person with technical certificate.

Make sure that the mains power supply you use is up to local construction and electronic code regulation, the over-load protection reliable earthing is essential.

Each fixture must be grounded correctly, and be installed according to related regulation.

Disconnect the fixture from mains supply before replacing any fuse. Avoid using the fixture in damp environment.

Protection against burning or fire

Do not attempt to bypass the thermostat switch or fuse.

Replace defective fuses with specified ratings only.

Keep flammable materials far away from the fixture. Minimum distance from the flammable materials is 0.5m.

Under the steady working state, the max temperature of exterior surface is 70°C, Please don't touch the moving head during movement.

The minimum distance between the fixture and the lighted objects is 0.5m.

Do not revise the fixture or install any parts not from FINE ART.

2. Product introduction

2.1 Fixture profile dimensions

Fig.2.1-1

Fig.2.1-2

2.2 Fixture introduction

Fig.2.2-1

3. Package & delivery

3.1 Included items

FINE 4037 PIXIE LED is packed with flight case. One single standard flight case carries two fixtures, Included items listed below (shown as table 3.1-1):

Accessories	QTY	UNIT
User manual	1	PCS
Warranty card	1	PCS
Female plug	1	PCS
Signal cable	1	PCS
Safety wire	1	PCS
Fuse	2	PCS

Table 3.1-1

3.2 Transportation lock

For the ease of transit, there is a protective lock in the tilt, the light output faces tilt towards the base while the zoom lens assembly retracts into the body, shown as Fig.3.2-1.

Fig.3.2-1

3.3 Fixture Package

1. Before packaging, please shrink the head into the light body, and disconnect the fixture from power supply and wait at least 5 minutes for cooling.
2. Remove dust on the exterior surface and tight the Tilt lock.
3. Pack the fixture with an inner bag, grasp both handles on the base and carefully upside down the fixture, and gently place it onto the intended mounting recesses within the road-case.
4. Pack the included accessories into the road-case.
5. Road-case stacking do not exceed 2 layers and upside down the road-case is not allowed.

3.4 Unpacking

1. Open the road-case and unpack the inner bag.
2. Two person on each side grab the handle of the device, lifts the lamp out of the air box after lifting it up, then opens the top cover and side cover of the flight case. Pushes the two light clamps outward to the base, and hook the light clamp to the lift Hang up. Tighten the light- cranked disc nut, and then raise the boom to the point where the light exits the flight case and finally push the air box away.

Warning

Inspect the units upon reception. If there is any accident damage due to transit, do not use the units and notify FINE ART local distributor or contact Guangzhou CHAI YI LIGHT Co.ltd directly.

4. Installation

User must be termly check the fixture and its install materials, if you are non-qualified to check that, please contact the professional person. Wrong installation will result in fatal hazard.

The fixture working ambient temperature are between-10°C ~ 40°C, When ambient temperature over the range, don't operate the fixture. When the fixture are in installation, teardown, remove or servicing, don't stand in under the fixture. Operator must be insure the fixture are safely connected. The input power supply must match the specific type demanded by the fixture. Make sure the installation check annually by professional person.

4.1 Installing riggings

FINE 4037 PIXIE LED has its own integrated suspension fastener, which can be quick and easily locked on the bracket, shown as follow.

Fig.4.1-1

Warning

It is necessary to lock the suspension completely to avoid causing safety accidents.

4.2 Equipment installation

1. To inspect the truss hook/rigging are in good condition and can bear about 10times the weight of the light fixture. Be sure the truss or pipe construction can bear 10times the weight of all equipments including lights, truss hooks, cables and accessories.
2. Adjust the truss to be perpendicular to the base.
3. Hook fixture on fixed bracket, then lock truss.
4. If the truss can be lift automatic up and down, the light fixture can be lifted and hooked from flight case directly. When the lights equipments need to lift high, the working area below should have some barrier to ensure the installation works operated under safety condition. Finally suspend the fixture onto the truss and fasten clamps all and lift truss totally.
5. Connect a safety rope which can bear 10 times weight of the fixture, the attachment is designed to fit a clamp.
6. Check the transportation lock have been unlocked, Be sure there is no explosive or inflammable materials around the fixture in 0.5 meter around.

Fig.4.2-1

Warning

The safety wire should be attached to the hole on the mounting plate. Do not tie the safety wire to the handles instead.

Fig.4.2-2

The fixtures must be placed upright, minimum spacing between each two fixtures in an array is 900mm, arrangement layout as shown in Fig.4.2-2.

4.3 Tips for data link

Data linkage for the fixture may be provided by DMX512 connection and wireless linkage

•DMX connection

Note: The signal cable was type X connection.

Type X connection—if the external flexible cable or cord of this fixture is damaged, it shall be replaced by a special cord or cord exclusively available from the manufacturer or his service agent.

5-pin XLR connectors are provided for fixture DMX input and output. Pin 1 is for earthing, pin 2 is for minus signals, and pin 3 is for plus signals. To prevent and absorb the reflection and interference of the signals, each data link must be ended by a respective terminator.

5-pin XLR connector

Pin1: GND
Pin2: Signal(-)
Pin3: Signal(+)
Pin4/5:empty

Terminator

Terminator specification: a 120Ω plug-in resistor with rated power of 0.25W, soldered between pin 2 and pin 3 at the end of respective data link.

Fig.4.3-1

Connect the 5-pin XLR output of a lighting controller to the 5-pin XLR input of a first fixture on the link, then connect the 5-pin output of the said first fixture to the 5-pin XLR input of a second fixture. Similarly, repeat the above connection step and end the data link with a plug-in terminator. Shown as Fig. 4.3-2 .

Fig.4.3-2

If long-distance data transfer occurs, a DMX512 signal amplifier is necessary. The added amplifier is inserted between the lighting controller and the first fixture on the basis of a normal data link.

Notice:

- 1. No more than one signal input or output can occur in one fixture.
- 2. Don't split a data link via output ports on the fixture, use a DMX512 signal amplifier instead, if necessary.
- 3. Use only shielded-pair cables, and standard microphone cable is not reliable for long-distance data transfer.

●Wireless transmission(optional)

- 1. Customer might choose wireless edition fixture which supports wireless data transmission. Wireless signal control is pretty reliable within a 225m radius empty space, thus no need for physical connection for data transmission. All has to be done is to set up corresponding addresses.
- 2. 2.4GHz worldwide free frequency band available in wireless control. Such huge frequency band favors users with variable band options.
 - (a)Wireless receiving mode setup:
“Personality”→“Receive Mode”→“WDMX”
 - (b)Press emitter button to search preset address within a fixture. When it's done, remotely control a fixture through a controller, Shown as Fig.4.3-3.

Notice:

- 1. Emitter location: Distribute the antenna higher than any barrier on floor as possible.
- 2. Antenna direction: Emitting antenna points to receiving antenna.
- 3. Antenna location: Far away from the distractions, such as the WLAN antenna.

controlled fixture

Fig.4.3-3

5. AC power supply

5.1 Fuses

Power supply and fuses' type and rating:

Power	Fuse
100-240V~	15A 6.35X31.8

(Fig5.2-1)

5.2 Power connection

Note: Type X attachment for power supply connection. Method of attachment of the cable or cord such that any replacement can only be made by the manufacturer, his service agent or similarly qualified person. The person must have the relevant qualification to connect the power supply. The AC power voltage shall be suitable to the lamp provided with over-loading or creepage protection.

1. Connecting the equipment to the power supply, do not connect to silicon box system, or else, it will destroy the equipment. The fixture is provided with standard 2-pin socket. Please according to table 5.2-1 connect to power supply, Yellow/green line must be earthed. If you still have any question to the installation, please consultant with the experienced electrician.
2. When power is supplied, put the base switch to the position "I".

Color	Wire	Mark
Brown	Live	L
Blue	Neutral	N
Yellow/Green	Earth	

(Fig5.2-2)

6. Control panel

6.1 Control panel introduction

Fig.6.1-1

Fig.6.1-2

- 1.Exit
- 2.LCD display
- 3.Enter
- 4.DMX interface
- 5.Power input
- 6.Fuse
- 7.Power switch

6.2 Control panel operational instruction

1. Mains switch: It's power off when turning the mains switch to "O". And it's power on when turning the mains switch to "I".
2. Press  button to trigger the built-in battery(note:optional function) for startup fixture and enter the main menu interface for menu operation .
Note:◀Indicate the selected menu items in the menu interface. If you are sure to enter this menu, please press the runner to confirm. That is to say, enter the next menu and continue editing. If this menu option is not set in the entry address, the menu can be paged by rotating the runner.
▶Indicates that there are optional functions for editing or parameter adjustment in the next level submenu.
3. Jog wheel:
 - 3.1 Press down the jog wheel: enter an item/save the present value. Holds for a few more second, it will return to upper menu.
 - 3.2 Clockwise rotate: scroll down the page/increase the parameter value.
 - 3.3 Counterclockwise rotate: scroll up the page/decrease the parameter value.
4. LED signal indication
DMX512 signal input: The LED light is on and the dot appears on the right side of the address code.
5. Fan control
When used in places with low ambient temperatures such as theaters, can choose the silent mode.

Operation chart for the display panel function

Menu	Item	Options	Notes(Default settings in bold print)
Address Setting		001-512	DMX address
Specification Setting	Pan Invert	On	Reverse DMX pan control R->L
		Off	Normal DMX pan control L->R

1. Roller with button function:

- Press the button:
Enter the menu / Save the modified value, and long press to return to the previous menu.
 - Clockwise rotation:
Scroll down the menu to select the cursor / Increase the modified parameter values.
 - Counterclockwise rotation:
scroll up the menu to select cursor / reduce the modified parameter values.
- #### 2. Reverted display control:
- First press Escape key and hold it, and then press ENTER key to rotate 180 degrees display.

7. Technical feature

Light source:

37pcs 40W, 4 in 1 OSRAM leds
Average Life Span>50000h

Optical system:

Beam angle: 4~60°
Glass light guide rod+High-quality PMMA optical lens

Color system:

RGBW 4 in 1

Effect:

All-optical domain dimming, 65536 grade dimming accuracy
Fast strobe: 1-25Hz
Preset 65 color macro functions
Preset 64 effect macro functions

MOVEMENT PARAMETER:

Angle: Pan 540°, Tilt 240°
Precision: Pan=2.11°, Pan Fine=0.008°, Tilt=0.94°, Tilt Fine=0.0037°

CONTROL AND PROGRAMMING:

Control channel: 4 kinds of control channel modes(21/ 35/132/169)
Protocol: Standard DMX512,wireless DMX512 for option
Menu display: LCD display (3.5 inches), resolution ratio: 128 x 64; random switch of Chinese and English language; menu available to display 180° reversely
Non-contacting wheel operation mode
DMX Signal Connection: 3pin/5pin XLR input/output

Electronic control Technology:

Fixture reset is controlled through menu or light console
0-100% dimmer
Constant current drive mode
Temperature sensor, intelligently adjust the light source power
DMX channel level monitoring
Fixture information query

Intelligent fan speed adjustment

Initial brightness setting for all colors
Over current, over voltage and overheating protection

9. Routine maintenance

This fixture requires routine cleaning. The service life depends on the operating environment heavily. Please kindly contact CAIYI related technical personnel for more maintenance information not included in this user's manual.

Notice: Excessive dust, smoke fluid and particulate buildup will degrade performance and cause overheating or damage to the fixture that is not covered by the warranty.

Warning: Please unplug the fixture before you open any covers.

Cleaning

Optical components should be cleaned carefully and lightly. Coating face is easily damaged, do not use harmful solvent so as to avoid damage to plastic parts or coating parts.

Cleaning optical components

1. Switch off the fixture and keep it cool completely, then open the cover.
2. Clean the floats by dust collector or compressed.
3. Use cotton paper without smell or cotton cloth soaked with the water, distilled water to wipe the granular thing, don't wipe the surface, float things should be blown away by the pressure gas.
4. Use the cotton cloth or cotton paper without smell soaked with isopropyl alcohol to remove the smoke and other residues. A commercial glass cleaner may be used, but residues must be removed with distilled water. Clean with a slow circular motion from center to edge. Dry with a clean, soft and lint-free cloth or compressed air.

Cleaning fan and air vents

Remove dust from the fans and air vents with a soft brush, cotton paper, vacuum, or compressed air.
